

Stretches for the office

Preventing and managing discomfort, pain and injury

Stretches for the office

- Your body is designed to move. Holding static postures can lead to unnecessary build up of tension.
- **At least hourly (every 15 minutes is ideal): STOP, DROP and SHAKE.** Relax your neck and shoulders; drop your arms to restore normal circulation.
- Before you start your day follow the stretches, then regularly stop and stretch throughout your day.
- Stretches should be performed on both sides.
- Take a movement to the point of stretch and hold for 10-15 seconds.
- The green glow on the photos gives an indication of where you should feel each exercise, however this will vary from person to person.
- Should you feel pain or unexpected tension do not continue that stretch. Consult your health professional.
